1. Counts only data confirmed by the program's organization. Cells shown as "suppressed" are too small to publish: rates with fewer than 30 in the denominator, counts of 1 to 10, and facilities with fewer than 3 organizations.
2. Completion rate uses each program's own stated completion rule, over cycles with both counts known.
3. Participant-hours: 10 planned (hours per participant × enrolled). Planned hours are an estimate, marked approx.
4. These figures describe programs and participation. They show association, not cause.
